

## **5. Problem Areas in Miami-Dade County:**

The following presentations were made to the Task Force. Each of the presenters expressed their views on the possible solutions to the problems which they encountered as a result of Hurricane Irene. Information from the meeting notes has been paraphrased for those presenters who did not provide a written narrative.

Additional information on the problem areas may be found in the Appendices located in Volume 2.

The following pages also include maps of Miami-Dade County, divided into the North, Central and South Areas of the County. Please refer to these maps as needed when reviewing the problem areas.
